

Improvised Explosive Device (IED) Awareness

Designed to provide the students with a comprehensive overview of Improvised Explosive Devices (IED). The course will include IED anatomy, IED types, response guidelines and history of employment. At course completion participants will be able to demonstrate the following competencies:

- Define IEDs and understand different designs.
- Distinguish the major components of an IED and identify the features of potential targets.
- Recognize the different varieties of IED packaged-types and secondary devices.
- Identify and demonstrate an understanding of nationally recognized IED safety response measures.
