

# Technical and Emergency DECON Operations

Designed to address the process of removing or neutralizing contaminants that have accumulated on personnel and equipment during a hazardous waste emergency in order to protect workers from hazardous substances that may contaminate and eventually permeate the protective clothing, respiratory equipment, tools, vehicles, and other equipment used on site.

□ Furthermore, the course addresses measures to protect site personnel by minimizing the transfer of harmful materials into clean areas; prevent mixing of incompatible chemicals, and measures to protect the community by preventing uncontrolled transportation of contaminants from the site.
